Expected Level of Effort Statement

Students should plan to spend at least 45 hours in lecture or classwork and 90 hours in homework. If the course includes labs, clinical experiences, internships, externships, or other fieldwork, the hours assigned to these must be specified. With 135 total hours as a minimum over a four-week course, the students should be informed that they will need to work about 34 hours per week, which is roughly equivalent to a full-time job.
